A flawless gem, that emits smart puzzles with laser-sharp precision.

Lots of puzzles in varying difficulties and several new elements to discover along the way. Easy to get into. Only downside is that the puzzles can be solved with mere trial and error. This is most noticeable with the easy ones. Of course it's up to you to think ahead instead of just moving the blocks around. The flipside is that you can avoid roadblocks, which is nice.

I've played 6 hours and guess that i finished ca. 3/4 of the game.

Wholeheartily recommended, if you like puzzle-games once in a while.. To simply put it

(It's The Greatest Game You'll Ever Play)

What makes this news so great is, any computer with at least 2 gigabytes of ram can play it! And it's only \$10.00 USD!

Why Haven't You Bought This Game Yet If You Haven't Already?????. Where is the rest of that story . I have paid for this and now " waiting for episode 3 to 5 "

This is bad man come on get going !. Well, i can see why this game has a mixed review. The game in itself is a wonderful bump from the second Sparkle, Neo i believe it is, with a better leveling system with a cool DNA sync system, making the gamer feel more in control of the little spark it cares for with point distributions. The maps are what i would expect them to be, and the new quest log and mini-quests in the maps are cool, giving a bit more to do in content.

Now for the fun part. The game seems, unbeatable. It might just be me, but i like to complete things, i desire to eat every little element i see so my sparkle can become a big and strong destroyer of all things living in the void, which is bad it seems. My little spark couldnt move around well in areas with spikes and forced currents, making the 3rd, YES, the 3rd map incompletable. I cannot move to the 4th map until i collect 80 something elements in an impossible to navigate area, thus stopping all progression. This is a terrible design choice, and i dont see why i should stress out over what should be a casual swimming and eating adventure. Ive been stonewalled.

Learn from my mistake, or make a new file and do the bare minimum so progression is possible. With that said, i was about to give this a massive thumbs up, but becasue ive stumbled upon a literally game breaking mechanic, ill toss my joy aside caused by build-up of stress. Ill leave it open long enough to trigger the free cards, and after that, ill never open this particular title again.

5/10, wont microbe again.. There's a good concept for a game here, but it doesn't really translate to the actual game. Some ships can just out maneuver your ships and stay out of your firing range. Each battle is repetative and not very fun. I'm sure later on in the game there is more variation, but the first 20 minutes or so of playing was really not enjoyable. If you're looking for a successor to FTL or something similar, this isn't it. 4/10.. Best game if you are feeling like you need crazy items to kill someone. 10-10. Current length is right at about 30 min. The story doesn't exactly end but doesn't exactly leave off on a cliff hanger either. I'm not sure if more episodes will be additional DLC or not. Either way it's neat to see how stories can be told in VR and how the impact of what is going on is greatly enhanced because of the VR.

Meh.

The dialogue gets a bit stale. This game plays like I'm reading a internet forum debate between between an internet conspiracist and an arm chair nerd. Even worse, all the conversations have the tone like its coming from the same single person, talking to himself. That's really all this game is. Imagine a forum argument about some fake hypothetical situation that takes place in some cyberpunk dystopian kind of world and there you go.

Perhaps they need better English translations\writers.... MIDI. Terrible.. Sequel of Insane. Insane 2 is also awesome offroad racing game. This game has some more modes than Insane, but "Destruction zone" (one of my favourite) is the only missing. Control is easier than that in Insane and you get can use boost (turbo). AI of opponents is unfortunately primitive. I like more the hardcore difficulty level in Insane than this easy in Insane 2, but I like this game. The sad part is that I cannot find any server to play online. So - if you wanna play online - message me :). Here for the trading cards, emoticons, and backgrounds... Game is fun enough to play when your bored and want to play a calm game.. I clicked through this game while watching TV for an easy 100%. 10\10.. Great art, janky controls, unimaginitive puzzles, but it's the absolutely mangled writing and decimated grammar contrasting with the earnest tone that makes this a must-play.
